The Atlas is the first ever broad and long multidisciplinary and multi-lingual cartographic work on the Catholic Church in Poland. It consists of a map and an end of the detailed maps referring to specific issues. The map contains the political map of the Church in the context of world's national and multi-dimensional character of the Commonwealth within the third twenty-five years of the 18th century. The atlas depicts the administrative division, sometimes complementary to naming units of the state administrative, military, and parish educational system, or social care (hospitals and infirmaries). The text is a work of balance of the Catholic Church, presents, especially in the religious and political sense, the First Commonwealth before the division. It encompasses the territory ranging from the Odra River in the west to the Donuz River in the east, and from the Baltic Sea in the north to the Buzul and Carpathian Mountains and the Black Sea in the south. Today they belong to numerous countries: Poland, Lithuania, Latvia, Estonia, Ukraine, Romania, Moldova, and parts of Russia. The Atlas fulfills the functions of Polish and foreign historians who have already been recommended for a long time and requested such a scientific and valuable work. It helps us to understand better religious, cultural and political positions of Middle Eastern Europe at the end of the 18th century. and, above all, the Polish culture of those times.
