Course Syllabus

I. General Information

Course name	Object-oriented programming
Programme	Informatics
Level of studies (BA, BSc, MA, MSc, long-cycle	BA
MA)	
Form of studies (full-time, part-time)	Full-time
Discipline	Informatics
Language of instruction	English

Course coordinator	Dorota Pylak, PhD
Course coordinator	Dorota i fiait, i iib

Type of class (use only	Number of teaching	Semester	ECTS Points
the types mentioned	hours		
below)			
lecture	30	INF: III MATH: III or V	5
tutorial			
classes			
laboratory classes	30	INF: III MATH: III or V	
workshops			
seminar			
introductory seminar			
foreign language			
classes			
practical placement			
field work			
diploma laboratory			
translation classes			
study visit			

Course pre-requisites	Introduction to computer science.	
	Fundamentals of algorithms and programming	

II. Course Objectives

Familiarizing students with the methodology and technique of object-oriented programming.

Familiarizing students with the Java programming language

Presentation of features of the modern programming language

III. Course learning outcomes with reference to programme learning outcomes

	T	1	
Symbol		Reference to	
3,31	Description of course learning outcome	programme learning	
		outcome	
	KNOWLEDGE		
W_01	The student is able to present the basic concepts of object oriented programming	INF: K_W01, K_W06, MAT: K_W01, K_W04	
W_02	The student is able to analyze the source files of object oriented applications	INF: K_W03, K_W06; MAT: K_W01, K_W04	
	SKILLS		
U_01	The student is able to apply the rules for defining classes, creating objects and modeling selected issues in an object-oriented way INF: K_U04, K_K_U11, K_U17, MAT: K_U38		
U_02	The student is able to write an application in an object-oriented programming language	INF: K_U07, K_U08, K_U10, K_U11, K_U12, K_U17 MAT: K_U38	
U_03	The student is able to use inheritance and polymorphism, abstract classes and interfaces	INF: K_U08, K_U10, K_U11, K_U12, K_U17 MAT: K_U38	
SOCIAL COMPETENCIES			
K_01	The student is able to formulate a solution to the given problem, is open to the new solutions	INF: K_K01 MAT: K_K02, K_K05	
K_02 The student solves the given problems individually and while working in a group.		INF: K_K01 MAT: K_K02, K_K05	

IV. Course Content

- 1. Paradigm of object-oriented programming
- 2. The concepts of class and object, fields, methods, constructors, accessibility
- 3. Static fields and methods in classes
- 4. String, Math and Scanner classes- examples of usage.
- 4. Inheritance
- 5. The Object class and its methods.
- 6. Polymorphism.
- 7. Abstract classes,
- 8. Interfaces

V. Didactic methods used and forms of assessment of learning outcomes

Symbol	Didactic methods	Forms of assessment	Documentation type
Cymbol	(choose from the list)	(choose from the list)	(choose from the list)
KNOWLEDGE			
W_01	Conventional lecture /	Exam/Written test	Examination card / writ-
	Guided practice		ten test/report file
W_02	Conventional lecture /	Exam/Written test	Examination card / writ-
	Guided practice		ten test/report file

	SKILLS			
U_01	-practical classes	Exam/Written test	Examination card / writ-	
	-design thinking		ten test/report file	
U_02	-practical classes	Exam/Written test	Examination card / writ-	
	-design thinking		ten test/report file	
U_03	-practical classes	Exam/Written test	Examination card / writ-	
	-design thinking		ten test/report file	
SOCIAL COMPETENCIES				
K_01	Discussion, PBL (Problem-	Exam/Written test	Examination card / writ-	
	Based Learning)		ten test/report file	
	design thinking			
K_02	Discussion, PBL (Problem-	Exam/Written test	Examination card / writ-	
	Based Learning)		ten test/report file	
	design thinking			

VI. Grading criteria, weighting factors.....

To pass a course, the student has to attend a classes and has to pass the tests and the final exam.

- passing classes colloquia 90% of the final grade, student's activity and work during classes 10% of the final grade.
- written exam for people who have passed the classes. Detailed conditions of exemption are given to students with each course edition.

Detailed assessment rules are given to the students with each edition of the course.

VII. Student workload

Form of activity	Number of hours
Number of contact hours (with the teacher)	90
Number of hours of individual student work	60

VIII. Literature

Basic literature

Herbert Schildt, Java: The Complete Reference, Eleventh Edition, McGraw-Hill Education, 2018 Herbert Schildt, Java: A Beginner's Guide, Eighth Edition, McGraw-Hill Education, 2018 http://docs.oracle.com/javase/8/docs/

http://docs.oracle.com/javase/11/docs/

- C. S. Horstmann, G. Cornell, Core Java Volume I Fundamentals (10th Edition), Pearson Education, 2018
- C. S. Horstmann, Java, Core Java, Volume II--Advanced Features, 11th Edition, Pearson Education, 2019

Additional literature

- R. Sedgewick, K. Wayne, Algorithms, 4th ed., Addison-Wesley, Upper Saddle River, NJ, 2011.
- N. Wirth, Algorithms + Data Structures = Programs, Prentice-Hall 1976
