## Course Syllabus

Course from study programme for the cycle: 2022/2023

## I. General Information

| Course name | Analytic geometry |
| :--- | :--- |
| Programme | Informatics |
| Level of studies (BA, BSc, MA, MSc, long-cycle <br> MA) | BA |
| Form of studies (full-time, part-time) | full-time |
| Discipline | Informatics |
| Language of instruction | english |

| Course coordinator | Dr Grzegorz Dymek |
| :--- | :--- |

| Type of class (use only <br> the types mentioned <br> below) | Number of teaching <br> hours | Semester | ECTS Points |
| :--- | :--- | :--- | :--- |
| lecture | 15 |  |  |
| tutorial |  |  |  |
| classes | 15 | II |  |
| laboratory classes |  |  |  |
| workshops |  |  |  |
| seminar |  |  |  |
| introductory seminar |  |  |  |
| foreign language <br> classes |  |  |  |
| practical placement |  |  |  |
| field work |  |  |  |
| diploma laboratory |  |  |  |
| translation classes |  |  |  |
| study visit |  |  |  |

| Course pre-requisites | $\begin{array}{l}\text { 1. Ability to do arithmetical calculations on real numbers. } \\ \text { 2. Knowledge of basic formulas and functions. }\end{array}$ |
| :--- | :--- |

## II. Course Objectives

1. Gaining knowledge of fundamental notions of analytic geometry and mathematical methods used in it.
2. Gaining skills of formulate various problems in the language of analytic geometry.
3. Preparing to further study of computer science.
4. Gaining skills of the IT tools usage to solve problems of analytic geometry.

## III. Course learning outcomes with reference to programme learning outcomes

| Symbol | Description of course learning outcome | Reference to programme learning outcome |
| :---: | :---: | :---: |
| KNOWLEDGE |  |  |
| W_01 | Student knows fundamental notions and theorems of analytic geometry | K_W02 |
| W_02 | Student knows typical problems which can be described and solved by methods of analytic geometry | K_W02 |
| W_03 | Student knows basic examples illustrating listed notions | K_W02 |
| SKILLS |  |  |
| U_01 | Student presents correct mathematical reasoning, formulate theorems and definitions | K_U21 |
| U_02 | Student has ability to find own methods of solving various problems (vectors, lines, panes), in particular by using IT tools | K_U21 |
| U_03 | Student knows conics | K_U22 |
| SOCIAL COMPETENCIES |  |  |
| K_01 | Student is able to evaluate his/her knowledge from analytic geometry | K_K01 |

## IV. Course Content

1. n-dimensional Cartesian space. Points and vectors.
2. Lines, planes and k-dimensional hyperplanes.
3. Affine maps.
4. Conics.
5. IT tools for solving problems of analytic geometry available in computer labs.

## V. Didactic methods used and forms of assessment of learning outcomes

| Symbol | Didactic methods <br> (choose from the list) | Forms of assessment <br> (choose from the list) | Documentation type <br> (choose from the list) |
| :--- | :--- | :--- | :--- |
| KNOWLEDGE |  |  |  |
| W_01 | conventional lecture, <br> discussion, practical <br> classes | test, written exam, oral <br> exam | evaluated test, protocol |
| Conventional lecture, <br> discussion, practical <br> classes | test, written exam, oral <br> exam | evaluated test, protocol |  |
| W_03 | conventional lecture, <br> discussion, practical <br> classes | test, written exam, oral <br> exam | evaluated test, protocol |
| U_01 | discussion, practical <br> classes, laboratory classes, <br> design thinking, project- <br> based learning | test, written exam, oral <br> exam, preparation of the <br> project | evaluated test, protocol, <br> files |
| U_02 | discussion, practical <br> classes, laboratory classes, <br> design thinking, project- <br> based learning | test, written exam, oral <br> exam, preparation of the <br> project | evaluated test, protocol, <br> files |

| U_03 | discussion, practical <br> classes, laboratory classes, <br> design thinking, project- <br> based learning | test, written exam, oral <br> exam, preparation of the <br> project | evaluated test, protocol, <br> files |
| :--- | :--- | :--- | :--- |
| SOCIAL COMPETENCIES |  |  |  |
| K_01 | discussion, practical <br> classes, laboratory classes, <br> design thinking, project- <br> based learning | test, written exam, oral <br> exam, preparation of the <br> project | evaluated test, protocol, <br> files |

VI. Grading criteria, weighting factors.....

LECTURE:
The completion of laboratory classes is required. Written and oral exam together constitute the final grade:
91 - 100\% excellent
81 - 90\% very good
71 - 80\% good
61 - 70\% satisfactory
$51-60 \%$ sufficient
less than 51\% fail
LABORATORY CLASSES:
At least $80 \%$ of attendance is required. Tests and projects implemented in the computer lab together constitute the final grade:

91 - 100\% excellent
81 - 90\% very good
71 - 80\% good
61 - 70\% satisfactory
$51-60 \%$ sufficient
less than 51\% fail
Detailed assessment rules are given during lectures and laboratory classes.

## VII. Student workload

| Form of activity | Number of hours |
| :--- | :--- |
| Number of contact hours (with the teacher) | Lecture: 15 hrs. <br> Laboratory classes: 15 hrs. <br> Individual consultations: 30 hrs. <br> In total: 60 hrs. |
| Number of hours of individual student work | Preparation for classes: 15 hrs. <br> Studying books: 15 hrs. <br> Preparation for tests and exams: 30 hrs <br> In total: 60 hrs. |

VIII. Literature

## Basic literature

1. K. Borsuk, Multidimensional analytic geometry, PWN-Polish Scientific Publishers, Warszawa 1969.
2. R.A. Sharipov, Course of analytical geometry - https://arxiv.org/pdf/1111.6521.pdf

Additional literature

1. I. Vaisman, Analytical Geometry, World Scientific, 1997.
