Abstract: Science does not only not exclude faith in God, but it should lead to Him. The same media that are the fruit of human knowledge and skills, and in fact a gift of God, used with dignity can help their users to meet God, to discover Him in other people and bring closer the way of life which He offers to man in the 21st century. These contents belong to the area of research conducted by ks. prof. dr hab. Tadeusz Zasepa in the years 1984-2014, the results of which were presented in his numerous scientific publications.
