Abstract: In the academic year 2014/2015 the staff and doctoral students of Media Literacy Education at the Catholic University of Lublin undertook the project of media literacy education for priests of the Roman Catholic Archdiocese of Przemyśl as part of their permanent priestly formation. Approval for this idea was given by Przemyśl Archbishop Józef Michalik. The main subjects of the training were the role of social media in the work of new evangelisation, mental transformation of children, teenagers and the whole society in the light of widespread access to new information technologies, as well as the protection of children and teenagers from the dangers related to the use of the media.
